

Wide Open WEB-nesday Intro and Ideas - What Might You Do?

Attention 5S. It's your lucky day! It's our first Web-nes-day. It is a chance for you to explore or dive into subjects that interest you. It is also a chance to catch up and to practice skills you need to focus on.

- You must spend 1 hour or more...
- It is due Thursday. You will share your work and what you learned with your teammates.
- You will have this assignment every Wednesday- so there will be many opportunities to try different types of assignments.

Just like every day, there should be reading, a main topic, math and a skill. You can do one thing that involves more than one school subject or you can break it up into different sections.

You can fill in the sheet or write on google docs.

What might you do? See the suggestions below:

- **WRITE:** Work on something we are doing in school. Work on your poem. Write a story, review, article or something else connected to what we're doing in school.
- **MATH:** Continue with measurement, algebra or some math review that would help you... check out our math webpages. Work on your lab pages to get them done. Create your own math project, game or something else connected to our investigations.

- SKILLS: Practice your handwriting, keyboarding, drawing, core strength, meditation, music, sports, drawing...
- COMPLETIONS: Is there something you would like to get done so you can check it off your list? Use Web-nesday for that.
- TECHNOLOGY: Learn or get better at creating a podcast, powerpoint, GarageBand, blog, scratch, etc.
- WEBPAGE RESEARCH: Look on our class webpage and focus on a topic you want to learn more about. If you do that, complete the attached 'Evidence of Research Sheet.'
- GET OUT! Go outside and observe nature: clouds, bugs, trees, birds. Record what you see in your science journal
- EXPERIMENT: Conduct a science experiment. Check out Arvind Gupta's site from our webpage.
- INTERVIEW: Interview someone with a video camera or recording device
- OTHER?
